Agenda

Optimize every corner of your agency

- 1 **Personal Privacy**
- 2 **User Rights**
- 3 **Controls and Notifications**
- 4 **Transparent Policies**
- 5 **IT and Training**

Transform your agency. Make it an oasis of creativity and champion of productivity. Why use people to do tedious work software can do? Let computers do repetitive tasks and predict problems. Then, leverage human judgement to make the best decisions.

1. Personal Privacy

Personal Privacy Rights

Individuals have the right to Manage their Personal Data

Access Personal Data

Correct Errors in Personal Data

Erase Personal Data

A background image showing a close-up of hands clapping, with a person in a grey shirt and tie visible in the blurred background.

SOC I & II

Deloitte performs audit on SSAE

Annually Skills Workflow is audited by Deloitte

Audit also includes Security

Controls are in place to assure Data is Secure

Data is Encrypted in transit and at rest

Audit logs are kept on who changes Data and when

If Breached, there's a procedure inform Clients

Securing Data

Channels and Encryption

Data is encrypted both at Rest and in Transit

In transit is HTTPS up to TLS 1.2

PII when exported to files is PGP encrypted

At Rest for SQL Server using TDE Encrypted

At Rest for Cosmos & Storage using AES-256

Breaches

Procedures and Communication

When data is Breached there's a simple process
Every Key User of the breached Tenant is contacted
Contacts for Key Users per Instance are kept
Data is Encrypted in transit and at rest in Helpdesk
The Head of Security is Responsible for this Process

Consent on Data

Users grant consent to Data

Users grant the consent to the Company
PII changes are audited on who and when
Users can key in their own PII (self service)
Company may fill in the data if allowed by User

Data Processing

How PII is processed

PII is never processed by the system

The Birth Date is used for announce Birthdays

4. Transparent Policies

Transparent Policies

Provide Notice, Outline Purposes, Define Policies on Personal Data

Data is shown clearly and transparently

Clear Notice on data collection

Processing purposes and Use Cases

Detection and Deletion Policies

Processing Purposes

Documented on Help Centre

Details are stated in the Help Centre

Links to a from the User Profile to Help are provided

Help Centre explain what each field means

Education is also on not to expose PII

PII potential usage is explained in detail

Clear Notice

Communication

Users are clearly informed when changing PII
Automatic changes are also informed
Automatic Data is Username, AD User, Email
After data is changed, User needs to confirm
The User is Notified by email and Push
Storage is complete on User's confirmation
Audit is kept on who, when and what changed

Retention Policy

Terminated Users and Company Termination

When User is terminated, the User is inactivated
Data is only eliminated if User demands it
Company may scramble information if desired
Data scrambling includes Profile and Audit logs
If Company is terminated, data is kept for 35 days
After 35 days, the data is deemed unrecoverable

A blue and white striped hammock is suspended by ropes in a forest. The background is filled with trees and foliage, bathed in the warm, golden light of a sunset or sunrise. The hammock is empty and hangs diagonally across the frame.

5. IT and Training

IT and Training

Personal Identifiable Information

- 1 IT is Trained on how to answer Users**
PII, GDPR, Breaches, Precautions, Rights, Tools
- 2 Audit and Data Policies**
IT is educated on what is in Audit and how Data is stored and kept
- 3 Data Protection Officer**
The Company has to clear specify who is the Data Protection Officer
- 4 Microsoft Azure Compliance**
IT learns what is the role of Microsoft in PII and data

IT Training

Answering Users questions and proving Tools

IT is trained on how to answer Users' questions
IT can explain on how to extract data
And IT tutors Users on the Right to be Forgotten
This Document is part of the IT Training
The Document is public to anyone

Reporting

Audit and Dashboards

There is a set of Dashboards for GDPR

The data is controlled by User Access

Audit is also shown in the Dashboards

Audit shows who, what and when PII was edited

IT shows the User Profile as the center point

Compliance

It's the Client's Company Responsibility

Compliance is enforced by the Client

The Tools exist and are in Place

IT is 1st line Support, trained to ensure Compliance

There's Consent, Notification, Rights and Extraction

Everything is transparent and in line with GDPR

Helpdesk and Help Centre provide 2nd line Support

Azure also helps with Retention and Deletion

There are also tools to determine Compliance Scores

Data Protection Officer

The Company is demanded, by GDPR, to have one

The DPO is the responsible for GDPR at the Client
DPO receives training like IT

This Document is also a reference for the DPO

DPO should check the Company's score on GDPR

DPO must handle all systems (not just Skills Workflow)

Thank You!
